VERISURF SOFTWARE OPENS SALES AND SUPPORT OFFICE IN UK

ANAHEIM, CA – Verisurf Software today announced appointment of James Barnes as its exclusive sales representative in the United Kingdom and Ireland.

“We are very pleased to have James on our team to serve our customers in the UK,” said Ernie Husted, president of Verisurf. “He has extensive experience in metrology and technical manufacturing, and is fully capable of both sales and support for new customers as we grow in Western Europe, and to assist our current customers with informed technical knowledge and expertise.”

“I am very excited to be able to represent Verisurf here in the UK” said Mr. Barnes. “I am confident that the company’s technology advantages will create a large demand here as we begin the process of updating inspection and metrology capabilities for a variety of industries.”

Verisurf Software, Inc. is an advanced technology company that revolutionized manufacturing in the 1990s by providing breakthrough inspection, tool building, reverse engineering, instrument interchangeability and reporting capabilities. It recently introduced its newest update package, Verisurf X.
